DETAILED ACTION

Allowable Subject Matter

1. Claims 1-4 are allowed.

The following is an examiner's statement of reasons for allowance:

In reference to claims 1 and 4, the prior art of record (Lusignan et al. and Holcomb) does not explicitly disclose generating a shaped dither signal, summing the shaped dithered signal and subsampling the data points of the summed signal to produce a lower resolution rasterized waveform for display, in combination with the further limitations of claims 1 and 4 respectively.

In reference to claims 2 and 3, claims 2 and 3 depend upon allowable claim 1 and are therefore deemed allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

2. Applicant's arguments, see pages 10-13 of Applicant's arguments of the Appeal Brief, filed 01/10/07, with respect to 35 USC 103(a) rejection of claims 1-4 based upon Lusignan et al. and Holcomb, have been fully considered and are persuasive. The prior art rejection of claims 1-4 has been withdrawn therefore placing the application in condition for allowance. Note, the arguments bring about the exact definition from the specification of the term "shaped dither

signal" which, in combination with the processing performed upon and utilizing such a signal limitation, is not taught by the prior art.
